CHAIRIK FAMILY

**ERIK MAGNUSSEN**  
DESIGNER

Erik Magnussen designed the CHAIRIK series in 1996. Magnussen had a pragmatic view on design and production, and used his imagination to challenge both. The results have been outstanding. CHAIRIK® is the uttermost complete and simplified design. The design was based on studies of the best possibilities of utilizing compression molded plywood, making it incredibly comfortable. The chair has a solid support, without pressure on the spine.

At first, the series was one four-leg chair but as time went on, the series evolved and now consists of 25 different models and a bench series.

CHAIRIK can be upholstered in fabric or leather, or painted in the colours that you like the best. The chair is also available with seat upholstery, inner side upholstery or fully upholstered in two different thicknesses. Also available with on/off seat upholstery for ultimate flexibility.

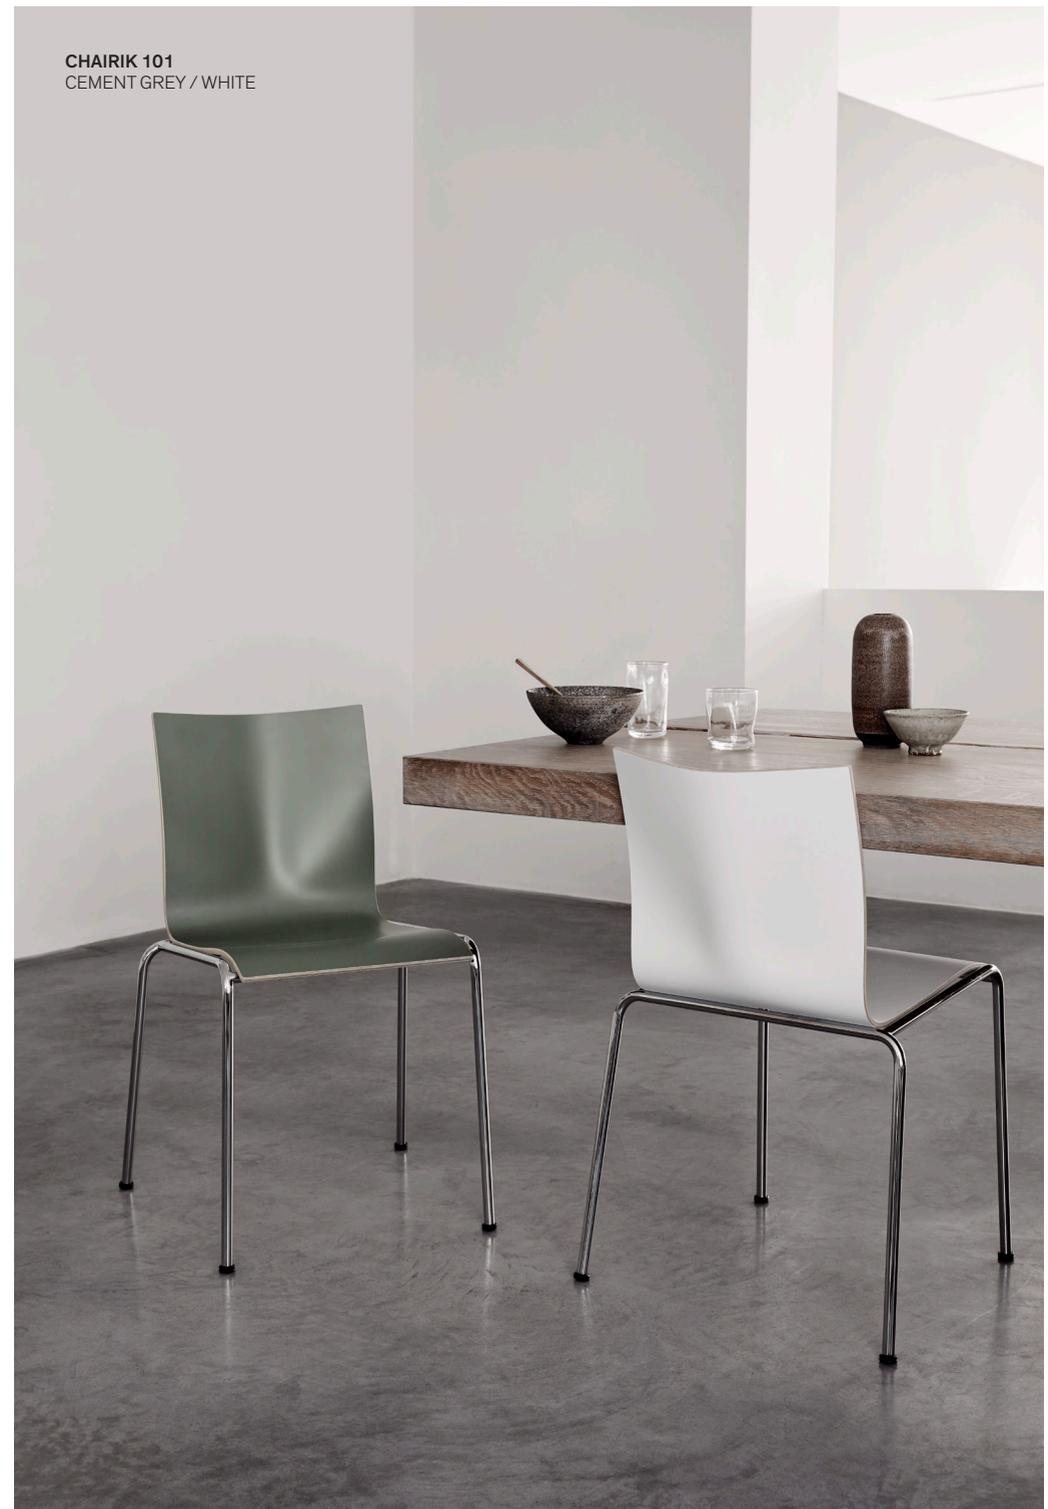

## A CLASSIC CHAIR

CHAIRIK is designed by Erik Magnussen in 1996. The chair is made to suit many demands.

## UNIQUE MAGNETIC SEAT UPHOLSTERY

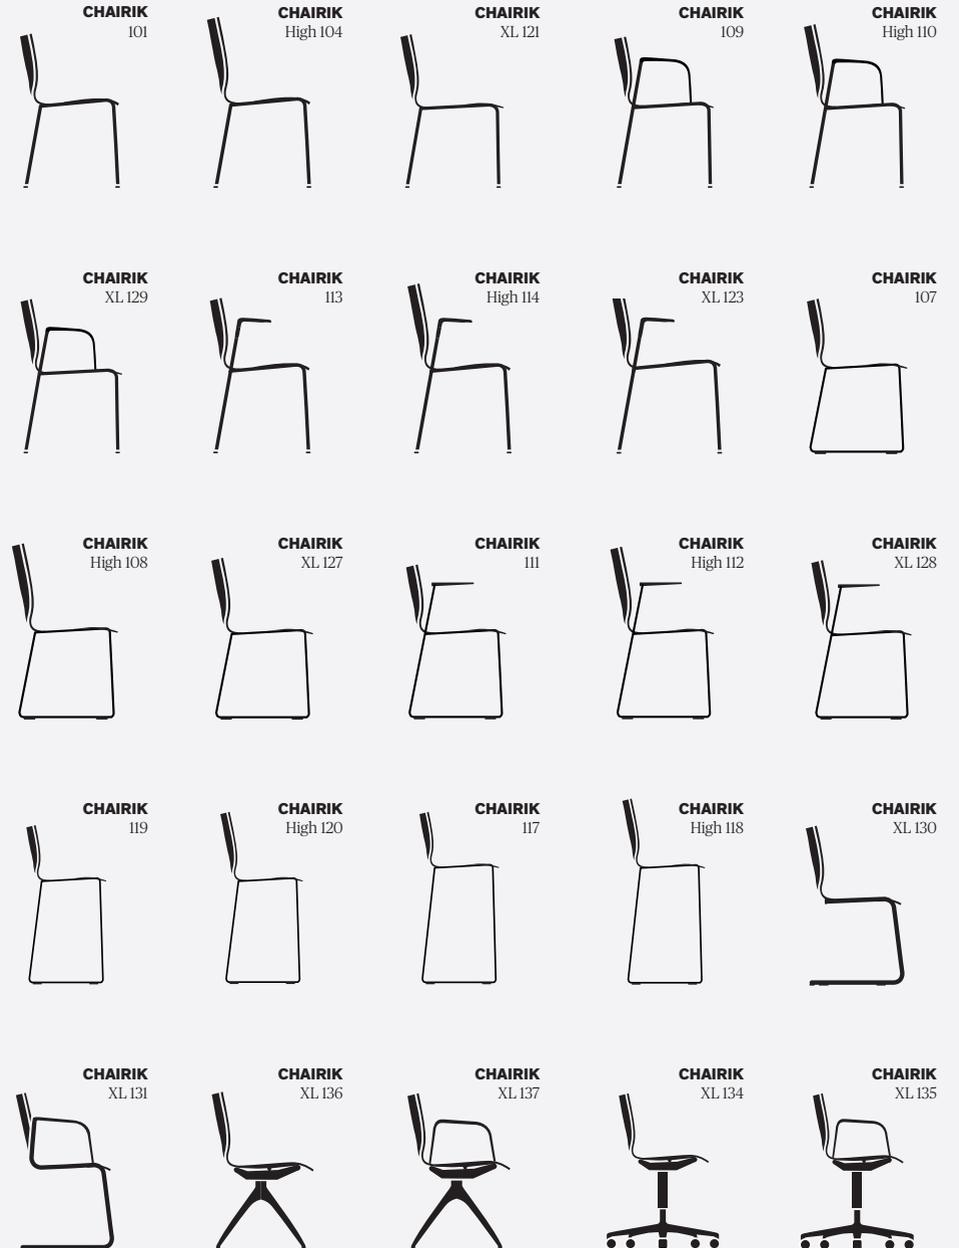

With the removable on/off seat upholstery you can easily change the look of the chair from an upholstered to an upholstered chair. With pre-mounted magnets you achieve ultimate flexibility to change the feel and look of the chair. The removable seat upholstery is easy to clean and change if needed.

# 25 DIFFERENT TYPES

At first, the series was one four-leg chair but as time went on, the series evolved and now consists of 25 different models.
